SPANISH - Native
CATALAN - Native
ENGLISH - B2 (FCE)

PROFILE

Frontend Developer with over 5 years of experience, specialized in React and TypeScript. I've worked in product teams following Agile/Scrum methodologies, applying best practices such as SOLID principles, Domain-Driven Design, Hexagonal architecture and automated testing. Proficient with tools and technologies like Redux, Styled-components, GraphQL, Zod, and React Testing Library.

Developer | Frontend / Backend | Testing | Agile | POO
REST API | GraphQL | HTML | CSS | JavaScript | React
TypeScript | GitHub | Less | SOLID | Styled-components | NodeJS

STRENGTHS

Web development experience in Frontend	Web development experience in Backend	Continuous learning
Creation of ad-hoc technological solutions / Process automation	Focus on customer satisfaction	Orientation towards the delivery of results with zero error

SOFT SKILLS

CREATIVE	TEAM PLAYER	PROBLEM SOLVING	OPEN-MINDEDNESS AND ADAPTABILITY

WORKING EXPERIENCE

Senior Frontend Developer (React)
Hiberus (Openbank) I 2025 - Currently

Working **as a frontend React developer**, in a product team, creating libraries leveraging core principles of clean and maintainable code applying Hexagonal architecture and DDD, SOLID, operating in an **Agile** environment, creating new features, maintenance, and fixing bugs.

Frontend Developer (React)
Iskra desenvolupament (Stradivarius) I 2022 - 2025

Working **as a frontend React developer**, leveraging core principles of clean and maintainable code such as SOLID, using technologies like React hooks, TypeScript, Styled-components, Zod, Formik, React-testing-library, Redux, GitHub, Jira, and Figma. I operate primarily in an **Agile** and **Scrum** environment,

Full stack Developer (React / Node)
Tappx (Programmatic advertisement) I 2020 - 2022

Working as a **full stack developer**, with a primary focus on frontend development. My role involves creating new features, performing maintenance, updating, and fixing bugs related to our own products and services. I specialize in the MERN stack, including React, JavaScript, Node.js, Express, Redux, and GraphQL.
